

When we released the Viper, just over 2 years ago, we knew it was something special and time has proven this. Results have shown it to be the highest performing 16 foot catamaran on the planet, and under handicap one of the best performers of any catamaran around.

You can sail 1 or 2-up and you don't need to be a giant, it's possible to win Global Challenge with a 14 year old crew, or sail with your girl friend and win Raid des Corsaires.

## Features

- High Volume / Low drag Hull
- Square Transom Shape
- Carbon Finished foils
- Versatile set up; Uni or sloop rig and 70kg – 165kg
